Education

Bachelor's degree (science) — Sep 2015 – Jun 2019
Farhat Hached High School Bizerte

Engineering cycle (software engineering) — Sep 2019 – Current
The Private Higher School of Engineering and Technology (ESPRIT)

Work Experience

summer internship — (July -August) 2021
VNEXT Consulting
I created a mini project (An automated student database management) with Microsoft SQL server, and i learned T-SQL in the process.

summer internship — (August -September) 2022
VERMEG for Banking & Insurance Software
I performed a Web Application Testing with Multiple Quality Criteria(security, usability, performance and not just functionality) and i learned how to think critically and from an end user's perspective.

Academic Projects

Projet Web (Wildlife conservation) — 2021
Development of a website for an association agency for the protection of animals and nature in Tunisia using PHP. The website we created not only to facilitate the management of nature protection events. But also helps you to adopt animals and which can help reduce the problem of abandoned animals.

**PIDEV integration project(E-sport-Team)** — 2022
Development of a Symfony website for an esports team.
Creating a CodeName One Mobile App(Consumption of APIs made on the Symfony part).
Creation of a Desktop application with JavaFX.

PIDEV SpringBoot project(Real Estate Project) — 2023
Development and conception of an application that helps people make better decision when purchasing a new property by:
- Centralizing relevant real estate offers.
- Analyzing and predicting prices (by area, time and place)
